Alliance

AIR CURTAIN

- **Keeps the heat out of cool airconditioned interiors**
- **Keeps the cold out of heated environments**
- **Prevents the entrance of dust, odours, fumes and insects**
- **Provides considerable energy savings**

The new Alliance Air Curtain is available in 3 different models, with airflows ranging from 960 to 1580 m³/hour. Mounted above entrance doors, the Alliance Air Curtain acts as an invisible shield separating the indoor environment from the exterior, yet allowing the door to stay invitingly open for customers.

Directing a quiet sheet of air vertically downwards, an Alliance Air Curtain ensures excellent interior climate control, thus providing a comfortable environment as well as significant energy savings in terms of airconditioning. The unit itself consumes minimal energy – approximately that of two 100W light bulbs! A High/Low switch control allows variation of air volume.

Easy to install and maintain, the Alliance Air Curtain is available in 3 widths: 900mm, 1200mm and 1500mm. For wider apertures, several units can be mounted side-by-side to provide a continuous air curtain.
